

Superb Image Quality with Cutting-edge Technologies

With 2/3-inch CCD image sensors, the newly developed digital signal processor (DSP) LSI provides superior S/N levels as well as better functionality. Also, a 16-bit A/D converter produces optimal visual imagery and enhanced black reproduction.

Adaptive Matrix Function

With the Adaptive Matrix function, images with well-balanced details can be reproduced even in strong monochromatic light conditions, such as at stage events.

Auto Lens Chromatic Aberration Compensation (ALAC-2)

With the newly designed DSP LSI, the ALAC-2 function automatically compensates for lens chromatic aberration. ALAC-2 works in both horizontal and vertical directions.

* Lenses need to be corresponded to ALAC feature.

Options Expand Usage

There are many optional accessories for the HDC-1700, including the HKC-DF20 Dual Optical Filter Unit and HKC-PSF20 Signal Format Software (1080/23.98p, 24p, 25p, 29.97p). These options supports a range of different shooting scenes and requirements.

Spirit Level

With the MEMS-Acceleration Sensor, the horizontal level can be displayed on the viewfinder screen, which helps particularly with wide-angle shooting.

HDLA Large Lens Adaptor Maximizes Operability

HDLA-1500, HDLA-1505, and HDLA-1507 adaptors maximize the operability of the HDC-1700. These optional adapters provide flexibility when applications require a large studio lens, and camera operators want to maintain hard camera control. They facilitate simple connectivity without time-consuming wiring and adjustments.

1.5 Gbps Optical Fiber Transmission

The HDC-1700 is capable of long-distance signal transmission up to 2,000 meters with the HDCU-1700 Camera Control Unit.

 * The HDC-1700 is only used in combination with the HDCU-1700.

HDCU-1700 Camera Control Unit (CCU)

The HDC-1700 can be configured with the HDCU-1700 dedicated camera control unit (CCU), which is a 19-inch half-rack size portable CCU for fiber cable connection. The HDCU-1700 CCU can control camera menu settings and display fiber condition on the front panel. It has an expansion slot for the four HD/SD SDI outputs board; and the

option board slot is used for HKCU option cards to expand the CCUs output capability to include VBS out, PIX out, WFM out, and component video out.

Optional Accessories

All accessories that are used with the HDC-1500 and HDC-2500 Series can be used with the HDC-1700.
