

LMD-1410

14 Inch LCD Monitor

The new LMD-1410 is a 14 inch LCD monitor aimed at broadcast and professional applications and considered to be successor to PVM monitors.

The LMD-1410 utilises the latest fast responding LCD panel which offers a picture with high brightness, contrast and a wide (170 degree) viewing angle.

Control buttons, input and output, monitor stand are all combined with the LCD panel to achieve an all-in-one design. Operation and functions are consistent with PVM series, which enables easy replacement.

Slim, lightweight design of the LCD monitor provides outstanding installation flexibility. The back of the LCD has VESA standard mount with 100mm pattern. This allows flexibility in installation by using a wall mount bracket or arm stand.

LMD-1410 is designed to meet a wide range of picture monitoring demands in professional applications such as broadcast stations, OB vehicles, post-production studios, and digital photo studios.

Features

Accurate SD Signal Reproduction

640X480 dot VGA LCD panel provides an accurate translation of interlaced to progressive signals.

Monitor Resolution

Displays crisp images vertically and horizontally with high brightness, contrast and fast responding LCD.

Wide Viewing Angle

The LCD panel has a wide viewing angle of 170 degrees, horizontally and vertically enabling images to be viewed from various positions and angles.

VESA Mounting Standard

Complying with VESA standards, the LMD-1410 can easily be mounted on a wall or ceiling.

Selectable Scan Size for Video Input and Aspect Ratio

The screen size can be selected between -3%, 5%. The aspect ratio can be switched between 16:9 and 4:3 according to input signals.

Benefits

Superb Picture Reproduction
