

Capture breaking news and events as they happen and broadcast it live from your smart mobile device

- Fully compatible with iOS and Mac OS devices
- Transmit live footage from your smart device or laptop with a wireless connection
- Works with the TVU Receiver or Transceiver for TV and Web broadcast

Designed to turn your portable smart device or laptop instantly into a transmitter, TVU Anywhere Pro is a powerful tool that enables organizations to instantly capture and transmit footage from anywhere at anytime. TVU Anywhere Pro is easy to use – just download the app to your smartphone or laptop, open the application and start transmitting video. TVU Anywhere Pro uses your device’s 3G/4G/LTE wireless connection and WiFi when available to transmit live video to a TVU Receiver or Transceiver.

Features

Sample features* available with TVU Anywhere Pro:

User Friendly Interface Screen – Go live instantly as well as monitor and control the transmission from an easy-to-use interface. Choose an optimal resolution and frame rate, touch the screen to automatically focus the camera or use the flash for nighttime transmissions. Key status information such as real-time transmission rate and live streaming time are easily accessible on-screen. TVU Anywhere Pro also supports metadata.

Store and Forward – Record video or audio with TVU Anywhere Pro and the content is automatically stored to the media directory on your smart device. Forward multiple stored media files at one time from your smart phone or tablet to a TVU Receiver back in the studio for playback or distribution.

IFB Enabled – TVU Anywhere Pro offers IFB functionality, enabling news operations centers to speak directly to the user without interrupting video transmission.

Aggregate WiFi and 3G/4G/LTE Connections – TVU Anywhere Pro aggregates the available bandwidth in 3G/4G/LTE and WiFi connections to ensure a resilient transmission and superior picture.

Control Transmission Settings from the Studio – Monitor and control the transmission of any paired TVU Anywhere Pro device from the TVU Receiver including going live, setting the latency and bitrate of the transmission, and using the optional IFB function.

Supports TVU Social - Easily snap a picture of your TVUPack’s live transmission or pick a photo from the camera roll on your smart device and post it directly to social media from TVU Anywhere Pro.
